

U14 Right Winger Role Canvas

Academy winger: stay wide, attack the isolated fullback, and create or finish with simple, fast decisions.

What we want to see

- Stay wide and ready for the switch.
- Attack 1v1 when isolated on the weak side.
- Drive outside for cutback or inside to combine/shoot.
- Arrive far post when the ball is on the left.
- React quickly after losing it.

Touches and skills to master

- Positive first touch down the line.
- First touch inside onto strong foot.
- Step-over, body feint, drag-push.
- Cutback, low cross, curled finish.
- Receive side-on and attack space.

Final-third job

- Create 2v1s with the RB when support arrives.
- Byline first: cutback or low cross.
- If inside lane opens, shoot or slip the 9.
- Attack far-post spaces when opposite side crosses.
- Press or attack the second ball after crossing.

Pro models / video study

- Saka: body shape, receiving, final ball.
- Salah: inside threat and far-post scoring.
- Rodrygo: controlled 1v1 carrying.
- Yamal: width, disguise, and timing.
- Study first touch, scanning, and end product.

How to have success

- Scan before the switch arrives.
- Slow the defender, then explode.
- Know where the RB, 9, and RCM are.
- Use one clear action, not too many touches.
- End actions with purpose and recover fast.

Team patterns

- Left overload -> switch to RW -> attack.
- RW inside -> RB overlap = 2v1.
- RW -> 9 set -> RCM/LCM support.
- If the attack is delayed, hold width.

Pressing role

- Jump to press the fullback on trigger.
- Show play one way and trap near the sideline.
- Counter-press instantly if you lose the 1v1.
- If beaten, recover and reconnect with RB.
- Stay switched on after every action.
